SUMMARY

Frontend / Full Stack JavaScript developer focused on building modern web applications with React, Next.js and TypeScript. Experienced developing complete personal projects including authentication, PostgreSQL databases, REST APIs, AI integrations and responsive interfaces. Passionate about writing clean, maintainable code and continuously improving through hands-on projects and technical learning.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend	React, Next.js, Vue, Nuxt.js, Tailwind CSS, CSS Modules, MUI, Zustand, TanStack Query, Axios, Vite
Backend	Node.js, Express, NestJS, REST APIs, JWT Authentication, bcrypt, Zod, jose
Databases	PostgreSQL, MySQL, MongoDB, SQLite, Prisma, Mongoose, Neon, Supabase
Testing & Tools	Playwright, Jest, Git, GitHub, VS Code, Vercel, dotenv

PROJECTS

GitHub Analyzer *Next.js • TypeScript • Gemini API • Zod*
GitHub: github.com/sopynya/github-analyzer | Live Demo: github-analyzer-kappa.vercel.app

- Built an AI-powered web application that analyzes public GitHub repositories and generates structured code reviews.
- Implemented repository parsing, optimized file selection and automated retry mechanisms to improve AI response reliability.
- Developed a scoring system evaluating code structure, maintainability, performance and security.
- Created a responsive interface with real-time visual feedback for repository analysis.

Hanagate *Next.js • PostgreSQL • Zustand • CSS Modules*
GitHub: github.com/sopynya/hanagate | Live Demo: hanagate.vercel.app

- Developed a full-stack visual novel tracking platform with user accounts and personalized collections.
- Implemented user authentication, favorites, reviews, ratings and "save for later" functionality.
- Built filtering, search and random discovery features for large datasets.
- State management with Zustand.

Fishis *Next.js • Neon PostgreSQL • TanStack Query • Zustand*
GitHub: github.com/sopynya/fishis | Live Demo: fishis.vercel.app

- Developed a browser-based fishing game with progression and inventory systems.
- Built game logic for collectible fish, random item generation and player progression.
- Integrated database persistence for player data and inventory.
- Optimized client-side state management and asynchronous data fetching.

DinoAPI *Next.js • JSON*
GitHub: github.com/sopynya/dinoapi | Live Demo: dinoapi-tau.vercel.app/

- Built a REST-style dinosaur information API with searchable endpoints.
- Designed structured JSON responses covering taxonomy, morphology, discovery data and geological time.
- Implemented filtering and pagination through query parameters.
- Developed accompanying documentation pages for both developers and end users.

CERTIFICATIONS

CodeSignal

- Full-Stack Engineering with JavaScript
- Front-End Engineering with React
- Building an Application End-to-End in JavaScript
- Dive Into Back-End Engineering with Express.js
- Mastering Test Automation with Playwright and TypeScript

Additional technical certificates available upon request.

EDUCATION

High School Diploma Expected Graduation: 2026
